Table of Contents

Foreword	IV
Scientific Committee	V
Holistic Model-Based Perspective on MedTech-Pharma Interfaces for New Combination Product Development <i>Y. Menshenin, J. Cancellieri, G. Bonnefond, R. Pinquié, P. Chevrier</i>	1
Utilizing DSM and SysML for Modeling Data Flows in Complex Networks – A Case Study on Autonomous Public Transportation <i>C. Langner, Y. Paliyenko, D. Roth, M. Kreimeyer</i>	11
DSM relational structures extended with fuzzy sets of higher types <i>P. Eklund, M. Löfstrand, S. Paul, M. Goodarzi</i>	21
Factored Dependency Structure Matrix for Representation of Multi-Connection Systems <i>H. Roh, L. Etzenbach, A. Oltramare, J. Norheim, O. L. de Weck</i>	31
Enhancing Workflow Efficiency in Innovative Automotive Processes: A Structured Approach Using DMM and DSM Matrices <i>D. Grazzini, A. Falegnami, A. Tomassi, C. Buccini, E. Romano</i>	41
Standardisation Of Field Hospital Development Through A DSM <i>M. Azzouni</i>	51
Towards Sustainability Modelling with Attribute Dependency Graphs - A Case Study on Industrial Robots <i>P. Schröder, A. Sathuluri, K. Hohnbaum, M. Mörtl, M. Zimmermann</i>	61
Two Sides of One Coin: Aligning Configuration System with Product Architecture for ETO Products <i>Q. Zhao, L. Hvam</i>	70
Managing Project Complexity Using a Matrix-Based Approach <i>M. P. De Lessio, E. W. H. Ee, R. T. W. Shieh</i>	79
DSMs for Organization Design: Incorporating Additional Criteria in Clustering Algorithms <i>R. Solberg, A. Yassine, N. Worren, K. Soldal, T. Christiansen</i>	89
Formalizing Constraint-Based Configuration of Variant-Rich Products through Dependency Modeling using Multiple-Domain Matrices <i>T. Schmidt, F. Winger, D. Roth, M. Kreimeyer, F. Mantwill</i>	99
Methodology for Predictive Value Engineering in the Early Product Development Phases <i>T. Musa</i>	109
Using DSM for Zoning of Tourism Flight Routes in Islands <i>P. Pourghadiri, S. Mohammadbagher Malaek</i>	119
Product Structural Complexity and Sustainability Impact: A Design Structure Matrix Approach <i>H. Basereh Taramsari, R. Nilchiani</i>	128
Applying Design Structure Matrix for Harmonization of European Train Control and Positive Train Control Systems in High-Speed Rail Integration <i>M. Efemuai, M. Pietrobelli, G. Kabir</i>	138

From Text to Structure: Extracting and Validating Complex System Representations Using Large Language Models 145
C. Lipizzi

Vehicle Software Configuration Strategies for SDVs: A Comparative Analysis of On-Board and Off-Board Methods 154

Foreword

It is with great pleasure that we welcome you to the **27th International Dependency and Structure Modeling (DSM) Conference – DSM 2025**, taking place at the **Stevens Institute of Technology in Hoboken, New Jersey, USA**.

The setting for this year’s conference – on the banks of the Hudson River with breathtaking views of the Manhattan skyline – offers not only an inspiring backdrop for intellectual exchange but also a vibrant space for reconnecting with colleagues and forging new collaborations.

This year also marks the return of the DSM Conference to the United States after five successful years hosted in Europe (2021–2024) and one virtual edition in 2020 due to the COVID-19 pandemic.

As the DSM community continues to grow and evolve, this year’s conference brings together researchers, practitioners, and thought leaders from around the world to explore the latest advancements in complexity management, systems thinking, and the use of the Design Structure Matrix across diverse domains. From academia to industry, our shared commitment to solving complex challenges through structured, systems-oriented approaches makes this annual gathering both timely and vital.

The theme for DSM 2025 is “**Integrating Systems Across Multiple Domains**”, continuing the direction set in DSM 2024 to broaden the scope of the conference and include all areas of Systems Engineering. This expansion reflects our ambition to foster a more holistic understanding of system integration and complexity across a wide range of disciplines.

Aligned with this theme, we are pleased to announce the support and sponsorship of key partners:

- **INCOSE**, the leading international systems engineering society,
- **Dassault Systèmes**, a global leader in simulation and digital engineering tools, and
- **The Systems Engineering Research Center (SERC)**, a U.S. Department of Defense University Affiliated Research Center.

As in every year, the conference is strongly supported by the **Design Society**, the leading scientific design community, as an endorsed event.

These strong collaboration partners enable us to cultivate stronger ties between research and practice and promote impactful advancements in the field.

For DSM 2025, authors were given the option to submit either **Full Papers**, included in **Part 1 of the Proceedings**, or **Extended Abstracts**, published in a **separate Part 2**. As in past years, all Full Paper submissions underwent a rigorous peer review process, evaluated by at least two members of our esteemed Scientific Committee. As a result, these proceedings offer a robust snapshot of the current state and future directions of Dependency and Complexity Management.

We extend our sincere gratitude to all contributors, reviewers, sponsors, and organizers whose efforts have made DSM 2025 possible. We are confident that this year’s conference will provide valuable insights, foster new collaborations, and contribute meaningfully to the ongoing development of our field.

We encourage you to engage fully with the technical program, participate actively in discussions, and take advantage of the many networking opportunities. Whether you are presenting your latest work, exploring new ideas, or attending for the first time, we hope this conference proves to be intellectually rewarding and professionally enriching.

On behalf of the organizing committee, **welcome to DSM 2025**. We look forward to a memorable and inspiring event. Warm regards,

Ali Yassine, Matthias Kreimeyer & Christopher Langner

Scientific Committee

Organizing Committee

Prof. Tyson Browning, Texas Christian University, USA
Prof. Steven Eppinger, Massachusetts Institute of Technology, USA
Prof. Matthias Kreimeyer, University of Stuttgart, Germany
Christopher Langner, University of Stuttgart, Germany
Prof. Ali Yassine, Stevens Institute of Technology, USA

Program Committee

All contributions in these proceedings have undergone a rigid review process. We would like to cordially thank all reviewers for their invaluable support.

Prof. Albert Albers, Karlsruhe Institute of Technology, Germany
Prof. Fabiano Armellini, Polytechnique Montréal, Canada
Dr. Arindam Brahma, Chalmers University of Technology, Sweden
Prof. Alencar Bravo, University of Québec in Trois-Rivières, Canada
Prof. Tyson Browning, Texas Christian University, USA
Prof. Patrik Eklund, Umeå University, Sweden
Prof. Steven Eppinger, Massachusetts Institute of Technology, USA
Prof. Pascal Etman, Eindhoven University of Technology, The Netherlands
Prof. Benoît Eynard, Université de Technologie de Compiègne, France
Prof. Kilian Gericke, University of Rostock, Germany
Prof. Marija Jankovic, École Centrale Paris, France
Prof. Matthias Kreimeyer, University of Stuttgart, Germany
Prof. Ting Liao, Stevens Institute of Technology, USA
Prof. Franck Marle, École Centrale Paris, France
Prof. Massimo Panarotto, Politecnico di Milano, Italy
Prof. Vesa Salminen, Häme University of Applied Sciences, Finland
Prof. Leonardo Santiago, Copenhagen Business School, Denmark
Dr. Sebastian Schweigert-Recksiek, :em engineering methods, Germany
Dr. Kaushik Sinha, Amazon, USA
Prof. Érika Souza de Melo, Université de Sherbrooke, Canada
Prof. Darli Rodrigues Vieira, University of Québec in Trois-Rivières, Canada
Dr. Tim Wilschut, Eindhoven University of Technology, The Netherlands
Prof. Ali Yassine, Stevens Institute of Technology, USA
Prof. Markus Zimmermann, Technical University of Munich, Germany

The International DSM Conference is an endorsed event of the Design Society.
