xxiv Institution of Engineering Designers

Chapter 1 – Design Education Methods

2 The Role of Learning- and Presentation- Portfolios in Design Educations
Bente Dahl Thomsen and Nis Ovesen

8 Design Pedagogy and the Threshold of Uncertainty
Michael John Tovey and Jane Osmond

14 Explore, Adapt and Reflect: Educating Design Students in Translating
Design Supporting Techniques across Domains
Jos Thalen, Mascha van der Voort and Julia Garde

20 From Gestalt to Experiencing – 2D/3D Design Fundamentals
Education in Different Contexts
Christian Wölfel and Katja Thoring

26 Pedagogy: Leading Technology
Phillipa Marsh and Les Arthur

30 Eco-Car: A Perfect Vehicle for Technical Design Teaching?
Lyndon Buck, Christian McLening and Jonathan Burgess

36 Teaching Cross-Disciplinary Collaboration in Design Projects with
Engineering and Medical Students
Stephan Fox, Vartan Kurtcuoglu and Mirko Meboldt

42 Media and Representations in Product Design Education
Maral Babapour, Viktor Hjort af Ornäs, Oskar Rexfelt and Ulrike Rahe

238 The Difference in Communication Between Architects and Engineers and the Effectiveness within Integral Design
Wim Zeiler

244 Fostering Professionalism
Colin Ledsome

249 Product Design Education: Different Perspectives
Christopher John Connor and Mark Beckwith

255 Culturally Influenced Learning: Why do some Students have Difficulty Visualising in 3D?
Mark Milne, Richard Morris, Tim Katz, Derek Covill and Eddy Elton

263 Preserving Culture in Design
Troy Austin Leininger

268 Problem Based Learning versus Design Thinking in Team Based Project Work
Marianne Stokholm

Chapter 6 – Case Studies

276 Curious Directions for Product Designers: How Technology is Affecting Medical Design Practice
Jennifer Loy

282 Increasing Police Trustworthiness through a User-Oriented Design Approach
Bente Moen, Jarle Fosse and Arild Berg

288 Workshop “Product Design for Elderly” in China: Design Education and Experience
Lau Langeveld

294 Muses in Design: A Comparison of Inspiration Techniques in Product Form Giving Education
Maaike Mulder-Nijkamp and Jan Corremans
Chapter 7 – Design Education in Business and Industry

302 Designers in Design Thinking
Erika Braun, Jessica Moreland, Emma Sanders and Carolina Gill

308 HCD in a Quasi-Market: Lessons from a Design Project in Kebri Beyah Refugee Camp, Ethiopia
Kathinka Hasselknippe, Gudrun Reikvam and Brita Fladvad Nielsen

314 Collaborative Innovation: A Study of Creative Teamwork in Offshore Industry and in Design Education
Nenad Pavel and Arild Berg

320 Computer Aided Cost Estimating
Huub Ehlhardt

Chapter 8 – Collaboration

328 Designing Home Decor Products for Umbra, within the International Collaboration format as an Academic Experience for Undergraduate Students
Alejandra María Velásquez Posada and Luis Fernando Patiño Santa

334 Virtual Product Engineering Network crosses Industry and University Chasm
Michael Bitzer, Sebastian Handschuh and Martin Langlotz

340 Facilitating Transition to Team Based Design Education
Christian Tollestrup

346 Flyable – Design of Fuselage for Two Seater Aircraft to be Flown by a Disabled Pilot: Learning Outcomes from Different Approaches to Lectures
Katherine Frost, Sara Linda, Ahmed Kovacevic and Sham Rane

Chapter 9 – Design Education in Practice

354 From Learning to Experiencing Principles of Engineering Design at the TUM
Ioanna Michailidou, Michael Roth and Udo Lindemann
Waste as a Starting Point - How to Educate Design Students to Become Active Agents in Closing Material Loops
*Isabel Ordoñez, Oskar Rexfelt and Ulrike Rahe*

New Competencies Required in Future Development of Design Education
*Nicola Crea*

1 Shade of Grey: Simplify to Excel in Sketching for Industrial Design Engineers
*John Daniel Öhrling and Bengt Holmqvist*

Teaching Design Engineering in an Interdisciplinary Programme
*Wessel Wits, Jasper Homminga, Maaike Endedijk, Klaasjan Visscher, Leonie Krab-Hüsken, Frank van den Berg and Pascal Wilhelm*

Social Cohesion Design, A Course for Designing Community Integrated Product Systems
*Clemes de Lange, Tjamme Wiegers and Jors Vergeest*

Experience, Design, A Student Pop-Up Shop
*Andrew Forkes and Barney Townsend*

Development of the Material Selection Practice in the Design Education – A Study Exploring Articulation of Material Requirements
*Karen Marie Hasling and Torben Lenau*

Flat Design vs. Skeuomorphism – Effects on Learnability and Image Attributions in Digital Product Interfaces
*David Oswald and Steffen Kolb*

Supporting the STEM Transition between School and University
*Avril Thomson, Phillip Sayer, Andrew McLaren and Derek Little*

Enhancing Student Motivation – “Raise the Bar”
*Anders Håkansson and Peter Törlind*

A Series of Student Design Projects for Improving and Modernizing Safety Helmets
*Johannes de Boer, Margot Stilma, Karin van Beurden and Wouter Teeuw*
Chapter 10 – Ethics and Emotions

450 Positive Ethics in Design Education
Marina Henrieke Sonneveld

456 Can Folding a Product Foster Emotional Attachment?
David Morgan

461 Olfactory Considerations in Design, A New Dimension to Product Experience
Brecht Daams

467 Re-Assessment of the Crafted Means of Production in Industrial Design
Jorge Andres Caro del Castillo Hernandez and Arild Berg

473 Promoting Environmental Sustainability by Fostering a Culture of Material Ethics
Shannon Chance and Pearl O'Rourke

479 Emotion Eliciting in Affective Design
Yoke-Chin Lai

485 Ethics – Research, Engineering Design …They’re All the Same Aren’t They?
Tania Humphries-Smith, Gordon Blount and John Powell
Chapter 11 – International Collaboration

492 When Global Design Meets European Global Product Realisation-Design Techniques and Challenges
Resham Advani, Katherine Frost, Elton Gwashavanhhu, Sara Linda, Sham Rane, Matthew Read, Mohamoud Samatar, Sultan Shafiq and Mohammed Sharif

498 An Assessment of Internationalization Impact on Engineering Education Quality Scores: A Brazilian Case Study
Anderson Edilson Presoto, Isabela Mantovani Fontana and Roberta Souza

504 Container Challenge – Protyping Distributed Collaboration
Joona Kurikka and Tuuli Maria Utriainen

510 Establishing and Leveraging Networks in Design Education Innovation Projects
Nicholas Spencer, Roderick Walden, Benny Leong, Mark Bailey and Mersha Aftab

516 Homecare Future Scenario Development by Students in a Multidisciplinary Setting
Margot Stilma, Fenne Verhoeven and Karin van Beurden

Chapter 12 – Using Technical Tools in Design

524 Educating Designers from Generation Y – Challenges and Alternatives
Miroslava Petrova

530 A New Consumerism: The Influence of Social Technologies on Product Design
Ian de Vere

537 RP vs Workshop: How Modelling Methods affect Early Design Development
Gary Underwood

543 Integrative Product Creation – Results from a New Course in a Learning Factory
Sinan Ugurlu and Detlef Gerhard
Chapter 13 – Creativity

562 How to Educate for Creativity in Creative Technology?
Angelika Mader and Edwin Dertien

568 A Design Process for Creative Technology
Angelika Mader and Wouter Eggink

574 Using Design Heuristics in Idea Generation: Does it Take Expertise to Benefit?
Markus Voss, Thorsten Sauer and Hulusi Bozkurt

580 Facilitating Students’ Design Sensitivity and Creativity in Design Detailing and Materialisation through Physical Models and Prototypes
Siti Salwa Isa, Andre Liem and Bjørn Baggerud

586 3D Printing: Improving Creativity and Digital-to-Physical Relationships in CAD Teaching
Jeff Barrie

592 Observation: Listen with Our Eyes and Look with Our Ears
Amos Scully

Chapter 14 – Curricula

600 Metaphors in Design Curricula
Viktor Hiort af Ornäs, Martina Keitsch and Kjersti Schulte

606 Integrating Different User Involvement Methods in Design Curriculum
Martina Maria Keitsch

612 The Missing Link: Co-Creation Through Design Engineering Projects
Nigel Garland and Zulfiqar Khan
Chapter 15 – Reflection on Teaching

632 Sustainable Design Technology: A Case Study of a Master Student’s Lamp Project
Arild Berg, Einar Stoltenberg and Janne Reitan

638 Open Design as an Education Tool in Architectural Studies
Alexandros Theocharis Vazakas

644 Evaluating Learning Outcomes of Soft Skills in Mechanical Engineering Education
Jan Breitschuh, Annica Helmich, Albert Albers and Gerd Gidion

650 A Case Study on the Design of a Modular Surgical Instrument for Removing Metastases using Engineering Design Tools
George Preca, Philip Farrugia and Aaron Casha

657 Personas and Role-Play Help Students (and Designers) Experiencing Reality
Gerard van Os and Karin van Beurden

663 Integral Design: The New Necessary Professional Skills for Architects and Engineers for their Role in Sustainable Development
Wim Zeiler

669 Demanding it All from the Novice Mechanical Engineer through Design and Manufacture
Marc Masen, Andrew Brand, Yanliuxing Yan, Julie Varley, Peter Spence and Peter Childs

Chapter 16 – Teaching Design Education Methods

676 Exploring the Evolution of a Mousetrap
Gunnar Gundersen
Design Reasoning Patterns in NPD Education Design
Tero Sakari Juuti, Timo Lehtonen, Kaisu Rättyä, Nillo Halonen, Mikko Vanhatalo and Päivi Kujansuu

An Experience-Based Approach to Teaching Product Design
Juan Jauregui Becker and Wessel Wits

Shared Memory in Design Complexity
Nenad Pavel and Arild Berg

Teaching Ethics in Engineering and Design, the Necessity of Concurrent Engineering.
Carlos Alberto González-Almaguer, Fernando Arriaga, Jose Manriquez, Alejandro Acuña, Grecia Gonzalez, Ricardo Huerta and Joaquim Lloveras

Aesthetics versus Usability: What Drives our Product Choices?
Stephen Trathen

Chapter 17 – Teaching Design Technology

Accommodating Different Learning Styles: Bridging Math and Form
Nis Ovesen

Where Design and Electronics Meet: Integrate Electronics in Product Design
Tommie Varekamp, Ianus Keller and Jo Geraedts

Teaching Digital Technologies in Industrial/Product Design Courses in Portugal
Ana Cristina Dias, Rita Assoreira Almendra and Fernando Moreira da Silva

3D CAD and Mental Scaling in the Product Design Process: Exploring the Creativity Potential in Design Education
Harald Skulberg

The Challenges of Developing Styling DNA Design Methodologies for Car Design
Shahriman Zainal Abidin, Azlan Othman, Zafruddin Shamsuddin, Zaidy Samsudin and Halim Hassan
Foreword

DESIGN EDUCATION & HUMAN TECHNOLOGY RELATIONS

The 16th International Conference on Engineering and Design Education (E&PDE) was held at the University of Twente on the 4th and 5th September 2014.

The conference was hosted by the Faculty of Engineering Technology of the University of Twente in Enschede, the Netherlands, in close collaboration with the Design Education Special Interest Group (DESIG) of the Design Society and the Institution of Engineering Designers (IED).

The E&PDE conference was initiated in 1999 in the United Kingdom and was consolidated as an international conference in 2004; alternately taking place in the UK and abroad. Its objective is to facilitate the bringing together of people from within education and industry who are interested in sharing expertise on the implementation and analysis of contemporary and developing methodologies in engineering and design education. It provides educators and researchers from product development, engineering and industrial design, together with industry and government representatives, with a platform for discussion on topical educational issues in design education and its future direction.

Conference Theme
As the host institution for E&PDE 2014 we chose to focus on the influence of technology on human behaviour and vice versa. We developed the theme of Design Education & Human Technology Relations in the knowledge that product designers and engineers influence human behaviour with their designs. This influence works in two directions. Designers develop products and services that help people in their functioning in daily life, that are tools for them to use. However, these tools often also change the behaviour and possibilities of their users. New and faster ways of transportation helped people to get to their work, family and friends, but it also gave them the possibility to live further away from their work. This created new phenomena, such as traffic lights and traffic jams. More recent, the internet made letters almost obsolete. More and more designers start to realize that their designs can have unexpected, and sometimes even unwanted consequences. Therefore it is important that design educators explore the interrelationships between engineering and technology, and behavioural, societal, cultural and ethical issues.
Our aims with the theme Human Technology Relations are to:

- Provide a networking platform for a broad variety of participants
- Explore how engineering and product design education contributes to a balanced development of technological opportunities and the needs of people for future society
- Discuss how engineering and product design education can lead to meaningful products for a world that is mediated by technology
- Explore how the focus on human technology relations can contribute to the development of creativity and design success
- Discuss how design education may best be used to address the social and ethical aspects of technology
- Seek innovative solutions for a better world through “best practices” in engineering and design education
- Embed the integration of all aspects of engineering and design in our curricula
- Explore the broadening and deepening of student experiences through international exchange

Conference Programme
25 countries will be represented at the Conference this year. 229 contributions were received which explored the full depth and diversity of the conference theme. Amongst them were 55 student contributions. After reviewing abstracts, full paper submissions and subsequent revisions 120 contributions were selected to be included in the proceedings, of which 12 were poster presentations at the conference. The accepted papers allowed the committee to build a conference programme with a number of major streams including; Design Education Methods, Using Technology in Teaching, Creativity, Design Education and Design Cultures, Ethics and Emotions and International Collaboration. As such, the programme covers the issues and meets the needs that arose when the conference theme was defined.

Our keynote speakers Professor Peter-Paul Verbeek and Remko van der Lugt presented interesting lectures on the subjects Design for Society: Understanding and Evaluating the Relations between Humans and Technologies and Educating the Product-Service System Designer: A call for Engagement.

Conference Host
The E&PDE 2014 took place on the campus of the University of Twente and was hosted by the Faculty of Engineering Technology. The University is located in the eastern part of the Netherlands, between the towns of Enschede and Hengelo. The Faculty of Engineering Technology provides educational programmes in Mechanical Engineering, Industrial Design Engineering and Civil Engineering, with a strong focus on the integrative aspects in these domains. Furthermore was the Conference supported by Saxion University of Applied
Sciences in Enschede and the Department of Industrial Design Engineering of KIVI, the Royal Institution of Engineers in the Netherlands.

**Acknowledgements**

This 2014 edition of the E&PDE conference was made possible through the commitment and efforts of many people. I would like to thank Ahmed Kovacevic, Judith Grace, Brian Parkinson and Erik Bohemia for their excellent leadership in organizing this conference and their dedication to the common cause: guaranteeing a conference series of growing quality and impact. I am grateful for having had the opportunity to work with Alison Parker and Nadine Pearce from the Institution of Engineering Designers, the work of organizing the conference would have been much more onerous without the practical support, hands-on experience and in-depth knowledge which Alison and Nadine provided.

I would sincerely like to thank all the members of the international academic review board. They succeeded in the timely review of a vast number of papers, while retaining a true professional and academic stance on the intrinsic value and qualities of all papers submitted.

Naturally, I would like to express my gratitude to my colleagues from the Faculty of Engineering Technology – especially Wouter Eggink, Maaike Mulder, Pepijn van Passel, Juan Jauregui Becker and Wessel Wits, and especially our conference secretary Ans Fokkinga.

On behalf of the conference programme committee;

Arthur Eger
Head of the Department of Product Design

EPDE 2014

XXI
The Design Society is an international non-governmental, non-profit making organisation whose members share a common interest in design. It strives to contribute to a broad and established understanding of all aspects of design, and to promote the use of results and knowledge for the good of humanity. The Design Society was founded in 2000, taking on the previous activities and responsibilities of the Workshop Design Konstruktion (WDK) Society, especially the organisation of the International Conference on Engineering Design (ICED) series of conferences, which had been running since 1981. Since 2000 the Society has organised ICED conferences in Stockholm, Melbourne, Paris, Stanford, Copenhagen and Seoul, with the 2015 event planned for Milan. It has also expanded with members from forty countries and with further very popular events such as the Engineering and Product Design Education conferences and the International Conference on Design Creativity among many other activities. The Society is very active in publishing papers and proceedings on design topics, and it has a developing portfolio of other design resources available to members including a repository of theses and collaborative agreements with a number of design research journals.

The Design Society concentrates on activities that transcend national boundaries, and, where possible, will seek to complement national activities. The objects of the Society are to promote the development and promulgation of understanding of all aspects of design across all disciplines by:

- creating and evolving a formal body of knowledge about design;
- actively supporting and improving design research, practice, management and education;
- promoting co-operation between those in research, practice, management and education;
- promoting publications and their dissemination;
- organising international and national conferences and workshops;
- establishing Special Interest Groups and other specialist activities;
- co-operating with other bodies with complementary areas of interest.

The Design Society is a charitable body, registered in Scotland, number SC 031694. Registered Company Number: SC401016
The Design Society is open to new members. www.designsociety.org
Established in 1945, Incorporated by Royal Charter in 2012, the Institution of Engineering Designers is the only organisation in the UK to represent those working in the many fields of engineering and product design.

Our members enjoy a range of benefits, including advice on professional codes of conduct, a job board, regular newsletters to keep members up to date with relevant developments and events and a helpful legal advice line. We host regular events which offer our members the chance to network with other professionals and members receive the Institution’s bi monthly journal – Engineering Designer.

We are committed to encouraging CPD for all our members, and support ongoing training and skills development.

We are licensed by the Engineering Council to assess candidates wishing to join the EC’s Register of Professional Engineers and Technicians and we also accredit academic and training courses, both for membership of the Institution and registration with the EC. Those members who achieve the appropriate academic and competence standards receive Chartered Engineer, Incorporated Engineer or Engineering Technician status.

We are also a licensed body of the Society for the Environment and are able to register suitably qualified and competent members as Chartered Environmentalists (CEnv).

We welcome members from any organisation that has a design function and employs design engineers and we have many academic teaching staff in membership. The first step to becoming a member is to register as an Affiliate. You can find out more about becoming a member of the IED at: http://www.ied.org.uk
