

edited by:
KAROLINE LÖTZSCH
ANDREAS WÜNSCH
SÁNDOR VAJNA

PROCEEDINGS OF THE
9TH INTERNATIONAL CONFERENCE ON
INTEGRATED PRODUCT DEVELOPMENT

September 5th-7th, 2012, Magdeburg

Chair of Information Technologies in Mechanical Engineering
Institute for Machine Design
Otto-von-Guericke University Magdeburg

First published in 2013

Contents

ID	Title	Page
01	Definition of a Functional Class of Ideas for Integrated Product Development and Supporting Theory Spitas, Christos	1
02	Challenges in the Design of Products for Elderly People Paetzold, Kristin; Wartzack, Sandro; Miehl, Jörg	13
03	How to Improve Virtual Teams and Communities Management? A Virtual Entities Management Support (VEMS) Diviné, Marc; Stal-Le Cardinal, Julie	22
04	New Teaching Methods and Tools for Development and Virtual Testing of Mechatronic Systems Picard, André; Albrecht, Katharina; Anderl, Reiner	32
05	Challenges for Teaching in Cross Enterprise Engineering Lachmayer, Roland; Vietor, Thomas; Lohrengel, Armin; Deiters, Arne; Kloppenburg, Gerolf; Hortop, Amy	42
06	Mission to Mars: How Product Lifecycle Management and Integrated Product Development Support the NASA Engineering Approach Burchardt, Carsten	50
07	Stars of the Future - New Product Development in Virtual Academic-Industrial Environment Vidovics, Balázs; Nagy, Klaudia; Mondvai, Diána; Bercsey, Tibor	57
08	Pragmatic Risk Assessment Approach for Product Development Škec, Stanko; Stankovic, Tino; Cash, Phil; Rohde, Danijel; Marjanovic, Dorian	65
09	Mechatronic Product Development: Potentials, Challenges, Terminology Neumann, Frank	75
10	Designing a Gearbox for a Novel Independently Controllable Transmission Using the Autogenetic Design Theory Wünsch, Andreas; Schabacker, Michael; Vajna, Sándor	85
11	What is Needed to Make Universal Design Solutions? Ottosson, Stig; Ottosson & Partners	94

Index of Keywords

Keyword	Paper ID	Page
A		
Adaptive Structuration Theory	03	22
Assistive Technology	11	94
Autogenetic Design Theory	10	85
B		
Biomechanics	02	13
C		
CAX-Engineering	06	50
Class of Ideas	01	1
Collaborative Tools	03	22
Cooperation Model	03	22
Cross Enterprise Engineering	05	42
D		
Design for Elderly	02	13
Digital Human Modelling	02	13
E		
E-Collaboration	03	22
Education	04	32
EGPR	07	57
G		
Gearbox	10	85
I		
Independently Controllable Transmission	10	85
Innovation	07	57
Integrated Design Engineering	06	50
Integrated Product Development	01	1
L		
LEGO Mindstorms	04	32
M		
MATLAB	04	32
Mechatronic Product Development	09	75
Mechatronics	04	32
Mechatronics	09	75
Mission to Mars	06	50
N		
New Product Development	07	57
O		
Operator	01	1

Keyword	Paper ID	Page
P		
Product Development	11	94
Probability Distribution	08	65
Product Data Management	06	50
Product Lifecycle Management	06	50
Project Management	05	42
R		
Risk Assessment	08	65
Risk Mapping	08	65
S		
Semantic Technologies	09	75
Socio-Economic Benefits	11	94
Synopsis	01	1
Synaptic Network	01	1
T		
Teaching	05	42
Topology Optimization	10	85
U		
Universal Design	11	94
User-Centred Design Methods	02	13
V		
Virtual Communities	03	22
Virtual Enterprise	07	57
Virtual Product Development	02	13
ViTeMeS	04	32
W		
Web 2.0 Technology	03	22
